CDMX, México

SUMMARY

Senior Backend Engineer with 10+ years building APIs and backend services (Python, FastAPI, Django) and integrating Generative AI / LLMs (Claude, Gemini, OpenAI) as the central copilot of the SDLC. Champion of Spec-Driven Development (SDD): cut review cycles by ~40% and enabled 80% autonomous resolution of N1 incidents. Experienced in AWS Serverless, CI/CD and technical leadership (Tech Lead) across fintech and retail.

EXPERIENCE

Backend Engineer & AI Specialist

Podemos Progresar

09/2025 - Present

CDMX

- Diagnose and resolve bugs, technical debt and incidents end-to-end applying Spec-Driven Development (SDD), cutting the review cycle by ~40%.
- Integrate Claude (SDD) and Gemini across the full SDLC: spec generation, static code analysis, automated debugging and technical documentation; driving adoption across engineering.
- Manage incidents with RCA and AI-assisted post-mortems; transfer knowledge to N1, enabling 80% autonomous resolution without senior escalation.
- Operate AWS infrastructure (Lambda, RDS, Step Functions) with first response under 10 min and critical incident resolution under 2 hours.
- Build internal serverless tooling (Enkoth — Lambda • Step Functions • EventBridge) for webhooks and integrations (Asana, Freshdesk, Notion, Slack), automating flows with n8n.

Stack: Python • Django • FastAPI • PostgreSQL • AWS Serverless • Docker • n8n • Grafana

Software Engineer → Tech Lead

Redsis

01/2022 - 09/2025

CDMX

- Built REST APIs (Python, Java, PHP) integrating GK POS with ERPs/CRMs via XML/SFTP automation for retail across 3 LATAM countries.
- Technical lead for the cloud GK POS Go-Live (Peru, Colombia, Bolivia): timelines, business/IT stakeholders, pre-sales demos and local-team training.
- Designed the promotions ETL pipeline for GK OmniPOS, enabling real-time commercial analysis for decision-making.
- Led the functional-technical team: defined the testing strategy (unit, regression, integration) and ensured end-to-end quality on every release.

Stack: Python • Java • PHP • GK POS • GK OmniPOS • XML • SFTP • Docker • ETL

Software Engineer

Softtek

03/2017 - 01/2022

CDMX

- Implemented billing systems, customer portals and ETLs integrated with SAP ERP/HANA; built executive dashboards in SAP BO for business leadership.
- Provided AMS support to Retail GK solutions (help desk, corrective/evolutive maintenance) under Scrum, sustaining a 98% SLA.

Stack: Python • PHP • .NET • SAP ERP/HANA • SAP BO • ETL • Web Services • Scrum

EDUCATION

B.Sc. in Computer Systems Engineering

Instituto Tecnológico de Orizaba

2006 - 2011

Orizaba, Mexico

Master's in DevOps

IEU Universidad

2024 - Present

Online

Advanced English (in progress toward B2)

Quick Learning

2026 - Present

Online

TRAINING / COURSES

Claude Code: SE with Gen AI Agents

Vanderbilt / Anthropic • 2026

Generative AI with Amazon Bedrock

Coursera • 2026

Developing Applications in Python on AWS

Coursera • 2025

GitHub Actions Bootcamp

Código Facilito • 2025

Understanding the World Through Data

edX • 2024

SKILLS

Languages

Python, PHP, JavaScript, TypeScript, Java, SQL

Frameworks & APIs

Django, FastAPI, Flask, React, Next.js 14, Node.js, REST APIs, Microservices, SSO/OIDC

Cloud • DevOps • Observability

AWS (Lambda, RDS, S3, Step Functions, EC2, CloudWatch), Serverless Framework (IaC), Kubernetes (Kustomize), CI/CD (GitHub Actions), Docker, n8n, Grafana, Supabase, Azure/GCP (basic)

Databases

PostgreSQL, MySQL, SQL Server, MongoDB, SAP HANA, DynamoDB

AI & Generative AI

Claude API, OpenAI API, Gemini API, Prompt Engineering, LLM Integration, RAG, AI Agents, Agentic Workflows, SDD / OpenSpec, AWS Bedrock

Management

Scrum, Jira, Asana, Notion, Postman

Soft Skills

Technical Leadership, Mentoring, Executive Communication, Stakeholder Management, Ownership, Problem Solving

LANGUAGES

Spanish

Native

English

B1 • B2 technical reading & writing

PROJECTS

Fidello — Loyalty Card System

Multi-business digital loyalty with points and roles, mobile-first via QR. JWT, real-time WebSockets, multi-tenant RLS and QR tokens (60s TTL + SHA-256 fingerprint) against replay. 100% SDD/OpenSpec.

Stack: React 18 • TypeScript • Vite • Tailwind • Supabase (PostgreSQL • Auth • Realtime) • PL/pgSQL • Edge Functions (Deno) • Vitest

VoltGrid — EV Charging Platform

Multi-tenant white-label SaaS for EV charging-station operators: live status over WebSocket, RLS tenant isolation, RBAC + SSO (OIDC), analytics (uptime, kWh, CSV export), auditable scheduler and PWA. 100% SDD.

Stack: FastAPI • SQLAlchemy 2.0 async • PostgreSQL 16 (RLS) • Next.js 14 • TypeScript • Tailwind • WebSockets • Docker • Kubernetes (Kustomize)

Trackion — Serverless Help Desk

White-label serverless help desk: end-to-end ticketing, admin-managed catalogs and an open API-integration module (generic webhooks + domain-event dispatch). Grafana tickets & SLA dashboards. SDD.

Stack: Python 3.12 • AWS Lambda • API Gateway • Serverless Framework • PostgreSQL • JWT • SSM • Grafana

JV Market — E-commerce

Full-stack e-commerce (streetwear/sneakers) deployed on AWS: JWT, catalog, cart, checkout, **Click & Collect**, **wishlist** and admin dashboard. API on API Gateway + Lambda; frontend on S3 + CloudFront. SDD.

Stack: Python • FastAPI • JWT • SQLite/PostgreSQL • AWS (Lambda • API Gateway • S3 • CloudFront)

Monitoreo-Cloud — Observability

Self-hosted observability stack (Grafana + Docker) over 3 sources: AWS serverless (Lambda/S3 via CloudWatch), local Docker containers, and Trackion's tickets/SLA. Collection with n8n + read-only IAM. SDD.

Stack: Grafana • Docker • n8n • PostgreSQL • AWS CloudWatch • Lambda • S3

dataMasterGK

Excel → XML → SFTP processing with a web admin panel, centralized logging and Docker. Deployed to production.

Stack: Python • Flask • SQLite • Paramiko • Docker
