PORTFOLIO

SUMMARY

Senior Backend Engineer and Tech Lead with 10+ years designing APIs, distributed systems and cloud-native solutions (Python, FastAPI, AWS Serverless). Specialized in AI-native development with Claude, OpenAI, Gemini, Bedrock, RAG and Agentic Workflows. Lead technical teams in fintech and retail and accelerate delivery through Spec-Driven Development (SDD): -40% review cycles and 80% autonomous N1 resolution.

EXPERIENCE

Backend Engineer & AI Specialist

Podemos Progresar

09/2025 - Present CDMX

- Resolve bugs, technical debt and incidents end-to-end with Spec-Driven Development (SDD): -40% review cycle.
- Integrate Claude (SDD) and Gemini across the full SDLC (specs, static analysis, debugging, documentation), driving adoption across engineering.
- Manage incidents with RCA and AI-assisted post-mortems; transfer knowledge to N1, enabling 80% autonomous resolution without senior escalation.
- Operate AWS infra (Lambda, RDS, Step Functions): first response under 10 min, critical resolution under 2 h.
- Build internal serverless tooling (Enkoth - Lambda • Step Functions • EventBridge) for webhooks and integrations (Asana, Freshdesk, Notion, Slack); automation with n8n.

Stack: Python • Django • FastAPI • PostgreSQL • AWS Serverless • Docker • n8n • Grafana

Software Engineer > Tech Lead

Redsis

01/2022 - 09/2025 CDMX

- Built REST APIs (Python, Java, PHP) integrating GK POS with ERPs/CRMs via XML/SFTP automation for retail across 3 LATAM countries.
- Technical lead for the cloud GK POS Go-Live (Peru, Colombia, Bolivia): timelines, business/IT stakeholders, pre-sales demos and local-team training.
- Led the functional-technical team: defined the testing strategy (unit, regression, integration) and ensured end-to-end quality on every release.

Stack: Python • Java • PHP • GK POS • GK OmniPOS • XML • SFTP • Docker • ETL

Software Engineer

Softtek

03/2017 - 01/2022 CDMX

- Implemented billing, customer portals and ETLs with SAP ERP/HANA; executive dashboards in SAP BO.
- Provided AMS support to Retail GK solutions (help desk, corrective/evolutive maintenance) under Scrum, sustaining a 98% SLA.

Stack: Python • PHP • .NET • SAP ERP/HANA • SAP BO • ETL • Web Services • Scrum

EDUCATION

B.Sc. in Computer Systems Engineering

Instituto Tecnológico de Orizaba

2006 - 2011 Orizaba, Mexico

Master's in DevOps

IEU Universidad

2024 - Present Online

TRAINING / COURSES

Claude Code: SE with Gen AI Agents

Vanderbilt / Anthropic • 2026

Generative AI with Amazon Bedrock

Coursera • 2026

Developing Applications in Python on AWS

Coursera • 2025

GitHub Actions Bootcamp

Código Facilito • 2025

SKILLS

Programming Languages

Python, PHP, JavaScript, TypeScript, Java, SQL

Frameworks & APIs

Django, FastAPI, Flask, React, Next.js 14, Node.js, REST APIs, SSO/OIDC, Microservices, Event-Driven Architecture

Cloud • DevOps • Observability

AWS (Lambda, RDS, S3, Step Functions, EC2, CloudWatch), Serverless Framework, Kubernetes, CI/CD (GitHub Actions), Docker, n8n, Grafana, Supabase

Databases

PostgreSQL, MySQL, SQL Server, MongoDB, SAP HANA, DynamoDB

AI & Generative AI

Claude/OpenAI/Gemini APIs, Prompt Engineering, LLM Integration, RAG, AI Agents, Agentic Workflows, SDD/OpenSpec, Bedrock

Management

Scrum, Jira, Asana, Notion, Postman

Soft Skills

Technical Leadership, Mentoring, Executive Communication, Stakeholder Management, Ownership, Problem Solving

LANGUAGES

Spanish

Native

English

B1 • B2 technical reading/writing

PROJECTS

Fidello - Loyalty Card System

Multi-business digital loyalty (roles, mobile-first QR): JWT, multi-tenant RLS, anti-replay QR, **Google Wallet passes** (RS256 JWT) and admin-managed **feature flags**. 100% SDD • evolving.

Stack: React 18 • TypeScript • Vite • Tailwind • Supabase • PL/pgSQL • Edge Functions (Deno) • Vitest

Monitoreo-Cloud - Observability

Self-hosted observability (Grafana + Docker) over 3 sources: AWS serverless (CloudWatch), local Docker and Trackion's tickets/SLA. SDD.

Stack: Grafana • Docker • n8n • PostgreSQL • AWS CloudWatch • Lambda • S3

VoltGrid - EV Charging Platform

Multi-tenant white-label EV-charging SaaS: real-time (WebSocket), RLS, RBAC + SSO (OIDC), analytics and PWA. 100% SDD.

Stack: FastAPI • SQLAlchemy 2.0 async • PostgreSQL 16 (RLS) • Next.js 14 • TypeScript • WebSockets • Docker • Kubernetes

Trackion - Serverless Help Desk

White-label serverless help desk: end-to-end ticketing, catalogs and an open API-integration module; Grafana dashboards. SDD.

Stack: Python 3.12 • AWS Lambda • API Gateway • Serverless Framework • PostgreSQL • JWT • SSM • Grafana

Pyzzeria - Serverless ordering (Live Demo)

Serverless pizza-ordering demo with live order tracking: WebSocket + Step Functions Express (~70s), DynamoDB and OpenAPI/Swagger; deployed on CloudFront. 100% SDD.

Stack: Python 3.12 • FastAPI • Mangum • AWS Lambda • API Gateway (HTTP+WS) • DynamoDB • Step Functions • SAM • CloudFront

dataMasterGK - ETL Middleware (GK Retail)

Retail ETL middleware for GK: Excel > GK XML (4 interfaces) via SFTP/FTP, Flask panel and SQLite auditing. Re-engineered under SDD (idempotent, security).

Stack: Python 3.12 • Flask • Pandas • openpyxl • SQLite • Paramiko (SFTP)
